

Conflict Minerals Policy Statement

29 Jun 2022

To prevent the unintentional funding of armed conflict and human rights violations, trade of conflict resources must be stopped. Conflict resources are natural resources that are extracted from war zones and traded to fund wars such as those occurring in the Democratic Republic of the Congo (DRC).

The U.S. Securities and Exchange Commission (SEC) has adopted rules to implement reporting and disclosure requirements related to “conflict minerals,” as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The rules require manufacturers who file certain reports with the SEC to disclose whether the products they manufacture or contract to manufacture contain “conflict minerals” that are “necessary to the functionality or production” of those products.

The definition of “Conflict minerals” refers to minerals or other derivatives (specifically tin, tantalum, tungsten and gold) mined in the eastern provinces of the Democratic Republic of the Congo (DRC) and nine adjoining countries: Republic of Congo, Central Africa Republic, South Sudan, Zambia, Angola, Tanzania, Burundi, Rwanda and Uganda.

Envent Engineering Ltd. supports the elimination of conflict resources trade. Our policy is to only use materials that haven’t financed or benefited DRC armed groups and are therefore either “DRC Conflict Free” or made from recycled materials. Our suppliers are made directly aware of this requirement and are asked to retrace the origin down to the original smelter or refiner sources.
